## **Consulting, Publishing and Training for Cultural Heritage Professionals**

*Informatics: The interdisciplinary study of information content, representation, technology and applications and the methods and strategies by which information is used in organizations, networks, cultures and societies.*

*Archives & Museum Informatics* organizes conferences, workshops and seminars, publishes journals and monographs, and consults for archives and museums worldwide. For the past 12 years, our educational goal has been to provide specialists in archives and museum information systems with timely and challenging opportunities for professional exchange and training. Our consulting services emphasize inter-institutional collaboration, strategic planning and standards-based solutions.
